

Mathematical Geology

Volume 27, Number 1, January 1995

Contents

Editorial	1
<i>D. F. Merriam</i>	
Estimating Spatial Distributions of Heterogeneous Subsurface Characteristics by Regionalized Classification of Electrofacies	3
<i>Gerilynn R. Moline and Jean M. Bahr</i>	
A Model for Crack Connectivity in Rocks, a Discussion	23
<i>Javier B. Gómez, Amalio F. Pacheco, and Antonio J. Seguí-Santonja</i>	
Inversion of Dynamical Indicators in Quantitative Basin Analysis Models. III. Multiwell Information and Two-Dimensional Case Histories	41
<i>Z. Yu, I. Lerche, and O. Bour</i>	
The Perimeter-Area Fractal Model and Its Application to Geology	69
<i>Qiuming Cheng</i>	
Histogram and Scattergram Smoothing Using Convex Quadratic Programming	83
<i>Wenlong Xu and André G. Journel</i>	
Estimation of Regionalized Compositions: A Comparison of Three Methods	105
<i>V. Pawlowsky, R. A. Olea, and J. C. Davis</i>	
Classification Problems of Samples of Finite Mixtures of Compositions	129
<i>Carles Barceló, Vera Pawlowsky, and Eric Grunsky</i>	
Approximate Local Confidence Intervals Under Change of Support	149
<i>A. E. Tercan and P. A. Dowd</i>	

Mathematical Geology

Volume 27, Number 2, February 1995

Contents

An Application of the Deterministic Variogram to Design-Based Variance Estimation	173
<i>Clifford B. Cordy and Caryn M. Thompson</i>	
Efficient Generation of Conditional Simulations by Chebyshev Matrix Polynomial Approximations to the Symmetric Square Root of the Covariance Matrix	207
<i>C. R. Dietrich and G. N. Newsam</i>	
A Pseudo-Genetic Algorithm Suited to Compositional Data	229
<i>Alex Woronow</i>	
Sensitivity in Volcanic Hazard Assessment for the Yucca Mountain High-Level Nuclear Waste Repository Site: The Model and the Data	239
<i>Chih-Hsiang Ho</i>	
The Use of Stochastic Simulations and Geophysical Logs to Characterize Spatial Heterogeneity in Hydrogeologic Parameters	259
<i>Terry D. Lahm, E. Scott Bair, and Franklin W. Schwartz</i>	
Adjusting Stream-Sediment Geochemical Maps in the Austrian Bohemian Massif by Analysis of Variance	279
<i>J. C. Davis, G. Hausberger, O. Schermann, and G. Bohling</i>	
BOOK REVIEWS	301
ASSOCIATION ANNOUNCEMENTS	315

Mathematical Geology

Volume 27, Number 3, April 1995

Contents

Estimation of Semivariogram Parameters and Evaluation of the Effects of Data Sparsity	327
<i>Gregg Lamorey and Elizabeth Jacobsen</i>	
A Type Curve Approach to Estimating p for a p -Normal Transformation	359
<i>Dachang Li and Larry W. Lake</i>	
Land Surface in Gravity Points Classification by a Complete System of Curvatures	373
<i>Peter A. Shary</i>	
Analytical Calculations Related to Facies Simulation	391
<i>T. Egeland, F. Georgsen, Ø. Skare, and F. Alabert</i>	
Allometry in the Pliocene Bivalve <i>Astarte omalii</i> : A New Look at an Old Data Set	399
<i>James C. Brower</i>	
Is the Ocean Floor a Fractal?	421
<i>Ute C. Herzfeld, Isaac I. Kim, and John A. Orcutt</i>	
ASSOCIATION ANNOUNCEMENT	463

Mathematical Geology

Volume 27, Number 4, May 1995

Contents

Analysis of Fracture Network Connectivity Using Percolation Theory <i>Brian Berkowitz</i>	467
The Construction of Extreme Compositions <i>Ross M. Renner</i>	485
The Anthracite Smokers of Eastern Pennsylvania: $P_{S_2(g)}$ -T Stability Diagram by TL Analysis <i>Glenn B. Stracher</i>	499
Arcuate and Growth Faults in Basin Models, with an Application to a South Louisiana Roll-Over Structure <i>Z. Yu and I. Lerche</i>	513
BOOK REVIEWS	549
ASSOCIATION ANNOUNCEMENT	555

Mathematical Geology

Volume 27, Number 5, July 1995

Contents

Optimization Techniques for Integrating Spatial Data <i>Ute C. Herzfeld and Daniel F. Merriam</i>	559
Infill Sampling Criteria to Locate Extremes <i>Alan G. Watson and Randal J. Barnes</i>	589
Related Information Measures for the Associations of Earth-Science Variables <i>Guocheng Pan</i>	609
On the Determination of Paleoheat-Flux Using Data on End-Point State of Thermal Indicators <i>A. K. Alekseev</i>	633
Comparison of Approaches to Spatial Estimation in a Bivariate Context <i>Mustapha Asli and Denis Marcotte</i>	641
Generalized Cross-Validation for Covariance Model Selection <i>Denis Marcotte</i>	659
Inner Product Matrices, Kriging, and Nonparametric Estimation of Variogram <i>Subhash Lele</i>	673
LETTERS TO THE EDITOR	693
BOOK REVIEWS	703

Mathematical Geology

Volume 27, Number 6, August 1995

Contents

An Adaptive Grid Technique for Minimizing Heterogeneity of Cells or Elements <i>Thomas H. Robey</i>	709
A Scheme for Resampling, Filtering, and Subsampling Unevenly Spaced Laser Doppler Anemometer Data <i>Pascale Biron, André G. Roy, and James L. Best</i>	731
Conditional Simulation with Data Subject to Measurement Error: Post-simulation Filtering with Modified Factorial Kriging <i>Denis Marcotte</i>	749
Characterizing Heterogeneous Permeable Media with Spatial Statistics and Tracer Data Using Sequential Simulated Annealing <i>Akhil Datta-Gupta, Larry W. Lake, and Gary A. Pope</i>	763
Open and Closed Compositional Data in Petrology <i>E. H. Timothy Whitten</i>	789
SHORT NOTE	
Present Situation and Development of Mathematical Geology in Russia <i>D. A. Rodionov</i>	807
MEMORIAL	811

Mathematical Geology

Volume 27, Number 7, October 1995

Contents

Random Fractal Models of Heterogeneity: The Lévy-Stable Approach <i>Scott Painter</i>	813
Multifractal Modeling and Spatial Point Processes <i>Qiuming Cheng and Frederik P. Agterberg</i>	831
Automatic Identification of Rocks in Thin Sections Using Texture Analysis <i>Li Wang</i>	847
Fitting Matrix-Valued Variogram Models by Simultaneous Diagonalization (Part I: Theory) <i>Tailiang Xie and Donald E. Myers</i>	867
Fitting Matrix-Valued Variogram Models by Simultaneous Diagonalization (Part II: Application) <i>Tailiang Xie, Donald E. Myers, and Andrew E. Long</i>	877
ASSOCIATION ANNOUNCEMENT	889

Mathematical Geology

Volume 27, Number 8, November 1995

Contents

Determining the Spatial Scale of Variation in Soil Radon Concentration <i>M. A. Oliver and I. Badr</i>	893
Estimation and Inference in Inverse Methods for Kinetic Models of Hydrocarbon Generation <i>David R. Fox</i>	923
Moving Averages for Gaussian Simulation in Two and Three Dimensions <i>Dean S. Oliver</i>	939
BOOK REVIEW	961
